Boldenone price - under its amazing influence. Equipoise is the brand/trade name for the anabolic steroid Boldenone, which is an oil-based injectable anabolic steroid with the Undecylenate ester attached to it for a prolonged release rate and half-life. It is a derivative of Testosterone that retains Testosterone's anabolic strength but exhibits a reduced androgenic effect in comparison.

Equipoise EQ (Boldenone undecylenate) is an anabolic steroid developed for veterinary use. The drug is designed as a long-acting version of methandrostenolone, but the result was a steroid, which has completely different properties, despite the chemical similarity of the molecules. Boldenone is a molecule of Dianabol, which is devoid of 17.
