

Perimeters in daily life

1. Natalie has painted a picture (35 cm high, 60 cm wide). Now she wants to make a frame on her own. How many meters of wood would Natalie need if there should remain a 5 cm white border around the picture?
2. A square summer house (6 m) has rain drains on all sides. How much do the drains cost? The tinner sells them for 35€ per meter.
3. You can see a plan of a living room. How many meters baseboards are necessary? (dimensions in m)

4. **Homework:** Draw a plan of your room just like the one you can see in task 3). Afterwards calculate the amount of baseboards you would need for your room.
