GeoGebra – Assignment #1

Show me that you can do the basics!! (worth 10 points)

1. Construct a line segment and rename it $\overline{AB}$. Measure the length of $\overline{AB}$.

2. Construct a line segment $\overline{CD}$. Find the midpoint (called point E) of $\overline{CD}$.

3. Construct an angle and measure it.

4. Then bisect the angle.

5. Construct a line segment and the perpendicular bisector of that segment.

6. Construct a line and a line perpendicular to that line.

7. Use the text tool to add your name to the drawing canvas.
