O turinabol, scientific name 4-chlorodehydromethyltestosterone, is an oral anabolic steroid derived from Dianabol, with the addition of clostebol. These functions cause the anabolic to have a relatively high anabolic potential, while its androgenic effects (male characteristics) can be greatly reduced. Turinabol (nebo také t-bol) je orální anabolický steroid vyvinutý v 60. letech společností Jenapharm, který byl pro mnohé anabolických steroidem sám o sobě. Nicméně rozhodl jsem se o něm hovořit zde. A tady je proč: Turinabol je derivátem Dianabolu s přidávkem atomu chloru. #helth #who #nurse #nursing #nursingstudent #healtheducation #system #ministry #ministryofhealth #hospital #education #medicalstudent #medical #medicine #anatomy #medicalsurgicalnursing #psychology #nutrition #microbiology #fundamentalofnursing #biochemistry #pediatrics #sociology #obg #communication

Tournaments are a lot of work. And part of me always has a little more concern with a tournament. I mean. I go around trying to get you all to understand head risks one being Second Impact Syndrome (a concussion on top of another concussion that can cause death) asking you not to spar hard the week before a fight .and then we have a tournament where people fight one day and then go on to fight the next day again.

Turinabol non è un anabolico ampiamente usato, perché al giorno d'oggi è uno steroide difficile da trovare sul mercato. Inoltre, questo non è un anabolizzante che porta molti guadagni anabolizzanti, ma non porta anche tanti effetti collaterali. Essendo un derivato anabolico di Dianabol, il turinabol è usato da persone che cercano risultati più specifici, come nei momenti di taglio ... #headstand #sirsasana #yoga #yogapractice #ashtangayoga #postures #greenery #motivation #yogalife #yogaeverydamnday #yogi #yogateacher #mindfulness #yogalove #namaste #yogaeveryday #pilates #workout #gym #motivation #health #wellness #yogaeverywhere #healthylifestyle #yogachallenge #nature #yogapose #fitnessmotivation #healing #bhfyp 4-chlorodehydromethyltestosterone, or Turinabol as it's most frequently referred to, is an anabolic steroid which was originally developed in East Germany. Made public in 1962, the compound is essentially a modified form of Dianabol, another anabolic steroid, which was then combined with clostebol, 4-chlorotestosterone.
