Clenbuterol and winstrol are two hugely popular compounds used by gym-goers in order to burn fat and achieve a ripped body. I say 'compounds' because winstrol is a steroid but clenbuterol technically isn't. Clen's actually classed as a 'sympathomimetic amine' instead. While Clenbutrol rapidly burns fat, Winsol helps in maintaining lean muscle mass. This makes your body more toned and ripped fast. So basically, you do not lose any muscle mass. Another advantage of Clenbutrol is that it improves the circulation of oxygen in your body. Winstrol is a steroid (unlike clenbuterol) and is generally used for cutting - despite it having some anabolic effects. One of the main attributes that sets winstrol apart from

other steroids is that it doesn't convert into estrogen, which has many advantages. Firstly it greatly reduces the risk of gynecomastia (male breasts). Winstrol vs Clen: What Do They Do Both supplements are designed to burn fat. When you buy Clentrimix, then you are buying a fat-burning agent. When you purchase Winnidrol from Crazy Bulk, then you're buying a lean muscle and strength agent.
