Equipoise (Boldenone Undecylenate), or EQ, is a veterinarian grade anabolic steroid with a similar molecular structure to testosterone, where a double carbon bond was added to alter its structure. However, its effects are not very similar to testosterone; in fact, EQ was designed to be an injectable form of Dianabol (D-Bol). Equipoise Test steroid cycle Safe stack for moderate bulks and strength endurance. This is one of the few cycles that can maintain speed and stamina in boxing and contact sports. Boldenone is the main anabolic of the stack, it's not as fast-acting as testosterone. #Poland #forest #bodybuilding #arms #cardio #newsurrender #eatclean #gymtime #gymmotivation #biceps

I currently have onhand 50mL of tren E. 100mg/ml, a ton of test Cyp, and 40mL of equipoise @ 200mg/mL, nolva, and clomid I was wanting to run all these together. This will be my first tren cycle so Im not sure how much to do. I was thinking equipoise weeks 1-12 500mg/wk tren e. weeks 1-10 500mg/wk Test Cyp. weeks 1-12 300mg/wk 12-week Tren/Clenbuterol/Test Cycle. For this cycle you'll inject every day for 12 weeks: Week 1-12 - 50 mg/day Test Propionate, 50-75mg/day Trenbolone Acetate, .5mg/eod Arimidex. Throughout the cycle use a Dopamine agonist like Dostinex to reduce the amount of prolactin if necessary.

I've tried it with just test, then test and Tren and it's definitely the EQ. As you mentioned though, it could well be the dose. I think I lasted 8 weeks on it lol Yea Tren makes me anxious too but not as bad as EQ. The anxiety i get with Tren is manageable for the results Share this post. Link to post Share on other sites.

Test and EQ is a very versatile combo. You can use it to bulk or cut and see nice results. All you do is change your diet based on your goals. Seeing as this is your third cycle you could also throw in an oral steroid to kickstart it while you're waiting for the EQ to kick in (takes a good 4-5 weeks).

In about 7 weeks I'm going to start cruising since I've acquired some Sustanon for it. For my next blast, however, I have been very tempted to see what Test + Tren + a high dose of EQ would do for me. On paper, it sounds like it'd work wonders to me. EQ for the lean, vascular gains and the appetite. Tren for the strength, slight fat burning assistance and the vascular gains and, obviously, the ... Gli estrogeni sono degli ormoni steroidei derivanti dal colesterolo che insieme al progesterone sono i principali ormoni femminili, promuovendo così le caratteristiche sessuali secondarie della donna. Equipoise Cycle. An Equipoise cycle represents one of the most well-tolerated anabolic steroid cycles any man will ever implement. We cannot call it an extremely powerful plan compared to other steroids, but that does not mean it's not effective. Further, when conjoined with the right steroids, an Equipoise cycle can turn very powerful indeed.
