Descrizione. Lytryronin sodium è un ormone tiroideo sintetico. È un A-isomero di triiodothyronine naturale (T3). Gli ormoni T3-Max-25 della tiroide accelerano il metabolismo e pertanto vengono utilizzati per scopi medici per combattere l'insufficienza della tiroide, l'obesità, i disturbi metabolici e la stanchezza. Inoltre, la triiodotironina viene utilizzata quando la ghiandola tiroide. T3 naturale è un regolatore del metabolismo ossidativo dei substrati energetici (cibo o substrati memorizzati come il grasso, muscolo, e glicogeno) da parte dei mitocondri. I mitocondri, come ricorderete dal tuo liceo classe di biologia, sono regel henviste due come le "case cellule potere" fordi che producono ATP.

T3 Max 25: This is utilized clinically to deal with circumstances of thyroid deficiency, being overweight, specific metabolic problems as well as tiredness. T3 Max 25 improves the individual's metabolic process. The outcome is an enhanced speed of cellular task observed through a most quick usage of carbohydrates, fats as well as proteins. Typically, T3 for bodybuilding/fat loss purposes involves purposely ingesting a supraphysiological amount of T3 in order to increase your metabolism to a level that would otherwise be impossible. This can be achieved with as little as 25 mcg, however, not all T3 is created with equal quality. Gp t3 25 mcg zinc. Choose from weight loss or strength and muscle gain online training packages that are suitable for all abilities. Workout from Home . When used to treat mild to moderate hypothyroidism, the average replacement dose of levothyroxine sodium is approximately 1. T4 has a half-life of a week or so, while T3's half-life is less.

Daily dosage then may be increased by up to 25 mcg every 1 or 2 weeks. Usual maintenance dose is 25 to75 mcg daily. The rapid onset and dissipation of action of liothyronine sodium (T3), as compared with levothyroxine sodium (T4), has led some clinicians to prefer its use in patients who might be more susceptible to the untoward effects of thyroid medication.

Active ingredient is Liothyronine Sodium 25mcg Generic equivalent to Cytomel Manufactured by Genesis Biolabs Used for treatment of hypothyroidism Also used to treat goiter and to test for hyperthyroidism Usually taken once daily Comes in a strip of 10 tablets; Product information included, NO BOX View all pictures to see actual product More helpful information available on Google Search. click here!
