This steroid cycle kit, has green needles for drawing up, and long blue needles for injecting. The steroid pack has enough equipment for 1, 2, or 3 cycles depending on the drug injected (see below). Everything you need to administer anabolic steroids sorted, in one simple order. Oil based steroids can be drawn up with a 40mm or 50mm green needle, or (more easily) with a 40mm pink needle. The needle should then be changed for injection, and the steroid injected into a muscle - either in the glute (buttock) or into the quads (thigh) using a 30mm (1¼ inch) blue needle or into the delts (shoulder/upper arm) using a 25mm ... #meals #methylation #healthy #eatclean #broadpectrum #greens #protein #mealprep #longevity

Kisses are for more than just bonding. When we kiss, pheromones are shared with a loved one in order to see if we are a match. Pheromones are detected by olfactory receptors in the membranes in the lips which determine the desirability of a mate. When male testosterone levels drop due to environmental toxins, natural selection is altered, leading to women to get weaker signals from their mates. This is why men who are exposed to environmental toxins are less attractive to women.
