[Music, Electronics, Motors, Trending on eBay, Easy Returns, Under \\$10](#) Clenbuterol Dosage For Weight Loss The recommended dosage of clenbuterol for the treatment of bronchial asthma is 0.02-0.03 mg taken twice daily. However, according to the Drug Enforcement Administration, bodybuilders and athletes abuse this drug by taking 60-120 µg per day along with other performance-enhancing drugs (9). Clenbuterol isn't supposed to be used for weight loss - that's just an unintentional effect of the drug. Clen

is a fairly potent catabolic substance, which means it helps to burn fat, and it's also anabolic, which means it enhances growth and helps produce more hormones, just like anabolic steroids. Clenbuterol used for weight loss or performance enhancement can be acquired as a tablet, liquid, or injection. People using clenbuterol for this purpose typically use between 0.06 and 0.12...
