The only clinic in Europe with a specially designed bariatric mobile app for its patientsAs seen on BBC One · Modern private clinic · Specially trained teamService catalog: Gastric bypass, Gastric sleeve, Gastric band CJC-1295 and Ipamorelin For Weight Loss CJC-1295 is a new generation of peptides that stimulates lipogenesis (fat loss) faster than prior generations. It can be used short term to help with fat loss or combined with ipamorelin for a more long-term, sustained approach with additional anti-aging effects.

This is called CJC 1295. CJC-1295 was further modified by adding DAC (Drug Affinity Complex) to it. DAC binds to a blood protein called albumin, which increases it's half-life to 8 days. It is called CJC 1295 + DAC. CJC 1295 can also be compounded in a non-DAC form which mimics a more normal physiologic GH spike each night.

The recommended CJC 1295 DAC dosage is 30-60 g per 1 kg of body weight per week. Optimally split the dose into two injections during the week, as a slight decrease in efficiency is often experienced on the fifth day after administration. Increasing the dosages of 60 mg per 1 kg body weight per week does not improve efficiency.

All of your food sources should come from: Low GI (slow digesting or complex) carbohydrates. Lean protein sources. Healthy (omega 3 and 6) fat sources. Green and leafy vegetables. By following these guidelines and performing an effective resistance training split, you will without doubt see positive results whilst using CJC 1295 DAC.

CJC 1295 + Ipamorelin Weight Loss. This article defines what exactly CJC 1295 Ipamorelin fat loss are, and what they are conventionally used for and what both molecules are synthesised from. This article also goes in depth to discuss how both substances play a role in fat burn and peptides for weight loss, as well as the physiological effects it has on the body. FOR RESEARCH PURPOSES ONLY CJC-1295 with DAC is a research peptide and not approved by any medical board. Overview CJC-1295 is a tetrasubstituted 30-amino acid peptide hormone invented by ConjuChem, a biotechnology company in Canada. CJC-1295 primarily functions as a growth hormone releasing hormone analog. The way these peptides are engineered, its half life…

CJC 1295 and Ipamorelin are the best peptides for fat loss. There is no doubt about it, these drugs are going to give you the results you seek. Thanks to their ability to suppress hunger and increase weight loss, you can be sure that this peptide combination is the best around for losing weight. homepage
