If you decide to buy Primobolan Depot there are several things you need to understand. This is not a cheap anabolic steroid, and while we cannot call it the most expensive you will pay a lot more for it than most compounds. It is also one of the most commonly counterfeited anabolic steroids on the market. #photography #photoshoot #thickthighs #sexyfit #girlswholift #fitglutes #athlete #bodybuilding #abs #fitnessmodel #legs #lean #heart #art #ass #shesquats

Primobolan Depot is a relatively mild anabolic steroid carrying an anabolic rating of 88 and an androgenic rating of 44-57. In order for these ratings to hold some teeth consider the rating system. All ratings are derived using the testosterone hormone as the baseline. Injections of Methenolone enanthate (Primobolan depot) will cost cheaper than tablets, and their effectiveness is much higher. Tablets are a more expensive and less prolonged version of methenolone. The time of their action is less than 5 hours. The adoption of tablets does not cause toxic effects on the liver.

At approximately \$100 for a vial of Primobolan Depot, it certainly is one of the most expensive injectable anabolics. And if you opt for the oral version instead, the cost is on par with Anavar. The question is, does the high cost of the steroid justify its usage? Will you be able to generate any positive benefits from Primo?

The other problem is the cost. At what usually amounts to \$2 a pill and a necessity of 8 pills a day, the weekly price will exceed \$100 a week for a mild cycle. Therefore, Primobolan tablets are not in large demand.
