Discover the Top Rated Testosterone Supplement of 2021. Increase performance in everyday life! Feel stronger, leaner & more passionate. PHARMA TEST P 100 (Testosterone Propionate) is one of top-selling products of Pharmacom Labs. It is highly recommended as the base of both mass building and cutting cycles. Testosterone is responsible for promoting health and well-being through enhanced libido, energy, immunity, increased fat loss, gaining and maintaining lean muscle mass, preventing Osteoporosis (loss of bone density), and.

Testosterone propionate is a male sexual hormone with pronounced, mainly androgenic action, possessing the biological and therapeutic properties of the natural hormone. In a healthy male organism, androgens are formed by the testes and adrenal cortex.

Testosterone propionate U.S.P. 100mg. Testosterone propionate is a commonly manufactured injectable form of the primary male androgen testosterone. The added propionate ester will slow the rate in which testosterone is released from the injection site, but only for a few days. Testosterone propionate is, therefore, comparatively much faster. POSITIVES	TEST	RESULT
------------------	-------------	---------------

POS ———>	Anabolic Steroids and Agents	Positive
POS ———>	Nandrolone metabolite	Positive
	T/E Ratio > 6	

Anabolic steroid GC/MS procedure detects urinary metabolites and/or parent substances of the following drugs:

- 1-Androstendiol / 1-Androstendione / 1-Testosterone*
- Bolasterone
- Boldenone / Boldione / Quinbolone*
- Calusterone
- Clenbuterol (anabolic agent)
- Clostebol
- Danazol / Ethisterone
- Dehydrochloromethyltestosterone
- Desoxymethyltestosterone
- Drostanolone
- Epitestosterone (>200 ng/mL) (masking agent)*
- Estra-4,9-dien-3,17-dione
- Fluoxymesterone
- Formebolone
- Furazabol
- Halodrol
- 4-Hydroxytestosterone / Formestane (anti-estrogen)*
- 6a-Methylandrostenidione
- Mestanolone
- Mesterolone
- Methandriol
- Methandrostenolone (Methandienone)
- Methasterone
- Methenolone
- Methylnortestosterone
- Methyltestosterone
- Methyl-1-testosterone
- Mibolerone
- Nandrolone / 19-Norandrostenedione / 19-Norandrostendiol (Bolandiol)*
- Norclostebol
- Norethandrolone / Ethylestrenol
- Oxabolone
- Oxandrolone
- Oxymesterone
- Oxymetholone

Laboratory Directors:
 Mark J. DeLeo, M.D.
 Richard R. Wilber, M.D.

Specimen disposition: Specimens will be disposed as follows: Negatives, destroyed within 2 days; Positives, destroyed after 6 months; all methadone maintenance urine after 2 months.

Body Research Supply 1 x 2ml Ampoule. Contents: Testosterone Propionate 50mg/ml. Testolic by Body Research is Testosterone Propionate which is a fast acting oil based testosterone, It is very similar to other testosteroneTMs, like cypionate or Enanthate except it is only effective in the system for about five days, and therefore shots are required two to three times a week. Testosterone propionate is a common oil-based injectable testosterone. The added propionate extends the activity of the testosterone but it is still comparatively much faster acting than other testosterone esters such as cypionate and enanthate. While cypionate and enanthate are injected weekly, propionate is most commonly injected at least.

250 mg/ml. 10. A classical version of Sustanon® from Pharmacom Labs, PHARMA SUST 250 is a testosterone blend that contains four different testosterone esters. PHARMA SUST 250 is designed to provide a fast yet extended release of testosterone. All forms of testosterone are responsible for promoting health and well-being through enhanced libido.
