

# What is testosterone cyp used for?

## What does testosterone cypionate do to your body?

Testosterone cypionate is used to treat symptoms of hypogonadism in males. In this condition, males don't produce enough of the sex hormone testosterone. Low testosterone levels in males can lead to mood changes, poor concentration, erectile dysfunction (trouble getting or keeping an erection), and low sex drive.

## Is testosterone cypionate good for building muscle?

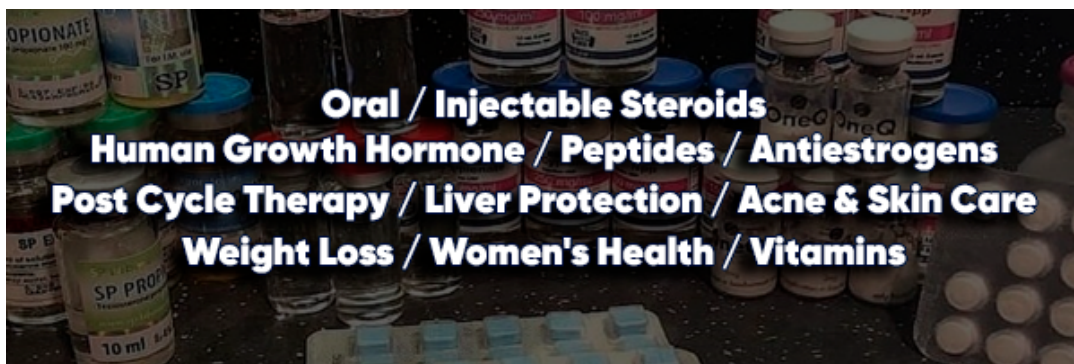

Anabolic steroids are simply hormones that produce growth of certain tissues (such as skeletal muscle). Research demonstrates the efficacy of testosterone cypionate for increasing protein synthesis, which in turn helps build muscle (in conjunction with proper diet and exercise) \*\*.

## Is testosterone cypionate long acting?

This type of testosterone is an eight-carbon ester form of testosterone. Cypionate is considered a “long acting” testosterone, metabolized in approximately seven to eight days.

## How long is testosterone cypionate good for?

Discard within 28 days of initial use. You should not use your medication after the expiration date printed on the carton and label.
