History of colors of the HGH tops. Before the existence of generic HGH labs in China, the yellow tops were used by Jintropin (GeneScience Pharmaceuticals), blue tops were used by Hypertropin (Neogenica Bioscience) and green tops were used for Igtropin (IGF-1 long R3). In 2007, both Jintropin and Hypertropin switched to using green color caps. view it now

Zhensu Chemical Tech Co., Ltd - China supplier of HGH, Jintropin, Blue top, Green top I know actually that getropin and hygetropin, are best the deal, highy quality prod, purest at ~96% check the lab test; and the price is not fucking expensive like for Jintropin. All blue top without label are not fakes, it's called GENERIC rhGH=> generic means thats its not branded like "no name" it's often without labels.

The yellow tops were used by GeneScience Pharmaceuticals, the makers of Jintropin. Blue tops were used by Neogenica Bioscience, the lab that made Hypertropin. A brand of injectable IGF-1, Igtropin, used green color tops. In 2007, both Jintropin and Hypertropin switched to using green color caps. History of colors of the HGH tops. Awhile back the jintropin HGH came with blue or green tops. They only come in yellow tops now due to counterfitting. Now there are special halograms etc.. So if someone is trying to sell you green or blue tops in Jintropin chances are they are out dated. Even call Gene-Sci it self or type in google for informational purposes only "HGH 2006. navigate to this web-site
