What is the right dose of sterols/stanols and policosanol and the best time to take them? Dosage for sterols is at least 400 mg with a meal or (1,000 mg for stanols), twice daily. For policosanol, it is 10 to 20 mg daily. See the ConsumerTips™ section for more about dosage and forms. Cautions: Stanazolol reduces the release of a chemical called bradykinin, that is responsible for causing breaking and leakage of blood vessels. This damage to blood vessels leads to sudden accumulation of fluids below the skin causing swelling (edema) as well as redness. Stanazolol blocks the action of bradykinin and treats angioedema. Aug 11, 2022What is the dosage of Stanazolol? Adult: PO- Vascular manifestations of Behcet's syndrome: 10 mg/day. Hereditary angioedema Initial: 2.5-10 mg/day. Maintenance: 2 mg/day or on alternate days or 2. ...

Plant stanols are present in small amounts in human diet. Their main sources are whole-grain foods, mostly wheat and rye.The daily intake of stanols in the average western diet is about 60 mg/d, whereas the intake of plant sterols is about 150-300 mg/d and that of cholesterol is 500-800 mg/d. The relatively low natural levels of stanols in the diet are too low to have a significant effect ... [browse around this site](#)
