

GeoGebra – Assignment #1

Show me that you can do the basics!! (worth 14 points)

You need to construct all of the following. It will AutoSave but you can hit save in the top right corner just to be safe 😊

1. Construct a line segment.
2. Find the midpoint of your line segment in question 1.
3. Construct an angle (using rays) and measure it.
4. Construct another angle (using rays) and bisect it.
5. Construct a line segment and the perpendicular bisector of that segment.
6. Construct a line and a line perpendicular to that line.
7. Use the text tool to add your name to the drawing canvas.
