Sustanon E Deca Durabolin - 600 Mg Of Sustanon A Week

Deca vs EQ Considered by a big majority of bodybuilders as a dream steroid, Deca Durabolin is superior to Equipoise. This is primarily because Deca is better than EQ in terms of retention of muscle mass and body strength gains. However, Deca users should always follow a very strict post cycle therapy with drugs such as Arimidex, Clomid, or.

Here is my favorite mass cycle: 500mgweek Sustanon 250, 400mgweek Deca-Durabolin for 12 weeks. 40mgday of Dianabol for the first 6 weeks. Deca only Cycle. A cycle using Deca only is very uncommon and discouraged, for good reason: this steroid will shut your natural testosterone production down so you'll experience some nasty effects.

Sustanon Deca Y Dianabol

4 weeks on sustanon 600 a week King Daddy • Mon, Apr 30th, '18 23:20 • 31 replies, 868 views Well I have 4 weeks so far on sustanon taking 600 mg twice a week as in 300 Monday 300 thursday. 8 week Sustanon cycle... I realize that sust is best ran for 10-12 weeks. However I was wondering what your guys opinions were on running it 8 weeks at 600 mg a week. This is my third cycle (previous 2 were test only). I just had my first pin of week 2. First week was 750 mg (250 on mon, wed, fri). This cycle I'm gonna run oral Winny at 50 mg ...

600 mg per week. 25 mg per day. 25 mg per day. N/A. 2 tabs per day. All of the above cycles are only recommended for those who have already performed the previous cycles listed - regardless of any advice you receive, you should never "dive in" at an intermediate or advanced level without running a prior "testing" cycle using ... We recommend to start the Sustanon cycle slowly and only increase the dosage as you need. Start with about 300 mg per week for 8 weeks. Then you would reach up to about 600 mg per week for 10 weeks but do not go over 1000 mg per week for 12 weeks. All Sustanon cycles should be followed by a Post Cycle Therapy plan. Beginners should stick to 300-500mg/week of

Sustanon for a 12-week cycle. This is a reasonably low dose and you 'can' combine it with other compounds. But if it's your first cycle, stick to one compound only. If you are a more experienced user, then you can increase the dose to 600-750mg/week if you are using Sustanon-250 alone.
