Testosterone Cypionate is a highly anabolic and androgenic hormone making it a great steroid to use if one is in pursuit of more size and strength. Testosterone Cypionate promotes nitrogen retention in the muscle and the more nitrogen the muscles hold the more protein the muscles store. Testosterone Cypionate can also increase the levels of.

Testosterone-Cypionate (Testosterone) In the United States it is the most commonly prescribed testosterone for the treatment of low testosterone, commonly referred to as Testosterone Replacement

Therapy (TRT) or Hormone Replacement Therapy (HRT.) It is also one of the most popular performance enhancing steroids of all time the world over and if you've ever considered anabolic androgenic. check this site out

Testosterone cypionate is a hormone that is highly androgenic and anabolic, meaning that you will experience huge gains in mass and strength with ease. Furthermore, the nitrogen retaining properties of cypionate are extremely advantageous to draw protein into the muscles, thus helping them repair and build themselves quicker and more effectively.
Testosterone Cypionate is another ester of the testosterone hormone and is one of then most widely used esters by bodybuilders and athletes. Test Cyp has a half life of about 10 to 12 days so is a slower release steroid that is usually used in longer cycles of up to 14 weeks.

Testosterone Cypionate, known to steroid users as "Test Cyp" is the synthetic version of the naturally produced Testosterone hormone. As we all know, this hormone is responsible for a lot of factors within the male body. Testosterone promotes a man's sex drive, helps with fat loss as well as gaining lean muscle mass, increases bone. Testosterone Cypionate Cycle. A Testosterone Cypionate cycle represents one of the most common among anabolic steroid users. It represents not only a highly effective plan but one that is very well-tolerated by most healthy adult men. For many men, it represents the foundation of their plan.

TRT Testosterone Cypionate Doses: In a TRT setting, Testosterone Cypionate doses commonly range from 100-200mg every 7-14 days, and in some cases every 21 days. Let's be very clear, regardless of the dose, any plan that calls for injections to be less than every 7 days is inefficient and represents a physician who does not fully understand. on yahoo
