For example, adding Oxydrolone (Anadrol) to 50 mg/day of Dianabol gives little added benefit to a steroid cycle; in contrast, adding Oxydrolone (Anadrol) to 50-100 mg/day trenbolone acetate or 60-80 mg/day Anavar (oxandrolone) gives dramatic improvement. In this its stacking behavior is similar to that of Dianabol, but not to that of trenbolone. Oxymetholone is one of the more potent oral anabolic steroids we have at our disposal; for that matter, it is one of the more potent anabolic steroids we have period, oral or injectable.

@erickmedinaflt putting in that work!! This was when I decided I wanted him on our team!! Zero excuses when it comes to overcoming obstacles or limitations!! @frontlinealternative is here to keep him strong, safe, and healthy!! Come and meet him @fitcon he will be kicking it and helping us out!! Great opportunity for him to rub elbows with some of the best!! #powerliftingislife #powerliftingmeme #powerliftingproblems #powerliftingthickthighthursday #powerliftingbeauty #powerliftingequipment #powerliftinggear [have a peek here](#)

Recommended dosage: 1 - 4 tabs per day Product Description: The only oral anabolic-androgenic steroid indicated in the treatment of anemias caused by deficient red cell production.

It's not "Male Coolidge effect" it's just "Coolidge effect" I bring that to you, because it's not male exclusive. Women participate in the Coolidge effect as well, just not nearly as much. So admittedly it's a predominantly male trait.

Dangers of LOW Testost

Rarely if ever will you meet a doctor that says low testosterone is extremely bad for men and can lead to fatal conditions.

Low Testosterone can lead to these

- 1. Osteoporosis**
- 2. Erectile Dysfunction**
- 3. Diabetes**
- 4. Heart Disease**
- 5. Muscle Loss**
- 6. Vascular Diseases**
- 7. Depression**

Men with low testosterone levels had a significant increase in risk of death compared with men who had normal levels.
