dbol only you are waisting your time. at least run a minimal amount of test with it. it will be incredibly hard for you to keep your gains during pct. i would run dbol 20-30mgs and test e 500mg a week. or just run test e 500mg a week for ur first cycle. as for on cycle gyno protection, forget about nolva. nolva is used for pct and if gyno shows up. use arimidex (anastrozole) .25mgs ed or .5mgs. Ok guys, I have one question for you and I need an HONEST answer. What would you recommend on a moderate cycle of Test Enanthate@500mgs for 8 weeks and Dbol@25mgs a day for the first 4 weeks to keep the Water Retention down and Gyno away? 1.)The Proactive Route! Nolvadex@10-20mgs ED throughout? Or Arimidex@.5mgs EOD throughout the cycle? 2.)

Sounds fine man, just don't go overboard with the d-bol. I'd say do something like this: Weeks 1-5: 250mg test/wk, 20mg d-bol/ed Weeks 6-10: 250mg test/wk Keep doses low cause you'll most likely need to increase dosages slowly as you get more cycle experience. Good luck and make sure to keep us up to date with your progress!

I'm 19 years old, 6'2, 14ish% bf. I just ordered Test E 250, 50 10mg dbol tablets and 50 20mg nolvadex tablets. It's too late to try and change my mind about steroids so don't bother. That's what I bought so I'll stick with it, so my question is, what would you do in my position if you had these. [read the full info here]

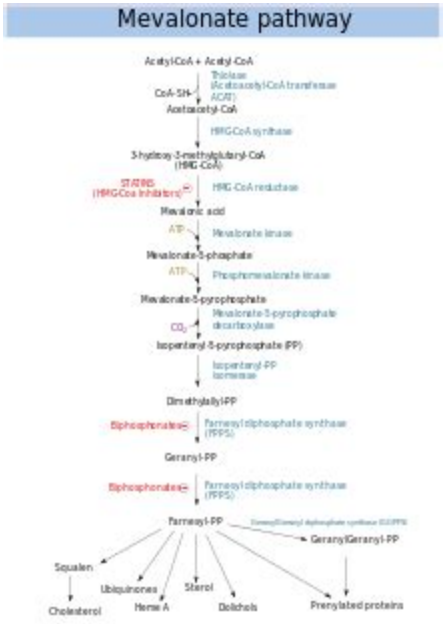

Advanced Dianabol Cycle. An advanced Dbol cycle makes use of a higher dosage of Dianabol while combining with at least one other powerful steroid such as Trenbolone or Deca-Durabolin. Week 1-12 - 1000mg/week Testosterone Enanthate. Week 1-10 - 600mg/week Deca-Durabolin. Week 1-6 - 50mg/ed Dianabol.

Hey guys I'm new here , just wanted some feed back on how does this cycle look Test e 1-14 wk 500mg Dbol 1-3 wk 50 Ed Tren a. 7-12 wk 600 mg Have pct on hand clomid and Nolvadex I'm 5'7 Body weight 240 Not sure if bf%

Please join this discussion about test e dbol and nolvadex question within the Anabolic Steroids category. Excerpt: I'm on these compounds for my cycle. My question is I am taking 20mg a day of nolv. so i dont get bitch tits or high water retention. I've Decided To Run My Cycle. 1-4 Dbol @ 50mg ED. 1-17Test E @ 500mg a week. 1-15 EQ @ 600mg a week. Start PCT 15 days after last shot. Clomid 100/100/50/50. nolvadex 40/40/20/20. Armidex EOD .25Mg Starting Week 5 Unless I Decide To Start It Earlier. Starts Thursday 4-24.

DBol Dosage in a Test-E Dbol Cycle. Jump-start production of new muscle tissue with 25 to 30 mg of D-bol a day for the first four weeks. D Bol has a half-life of about 5 hours, so if you choose to go with 30mg per day. Ideally you should take 10mg in between meals after every five hours. [check out the post right here]
