The optimal Anavar dosage for women is roughly 5 to 20mgs of Anavar a day. It is recommended that you do not exceed 15-20mgs - higher dosages will result in a higher chance of virilization. If you have never used Anavar before, start out with a small dosage of 5mg a day.

Female anavar 5mg 10 days in. Thread starter Andy060181; Start date Jun 19, 2021; Jun 19, 2021 #1 A. Andy060181 Member. My wife has been running her first ever cycle of anavar 5mg (split 2.5 am pm). Var is legit and tested. Wife is in very good health, 38 years old, ex dancer. Since day 2 she has had menstrual bleeding and bloating. She also. online

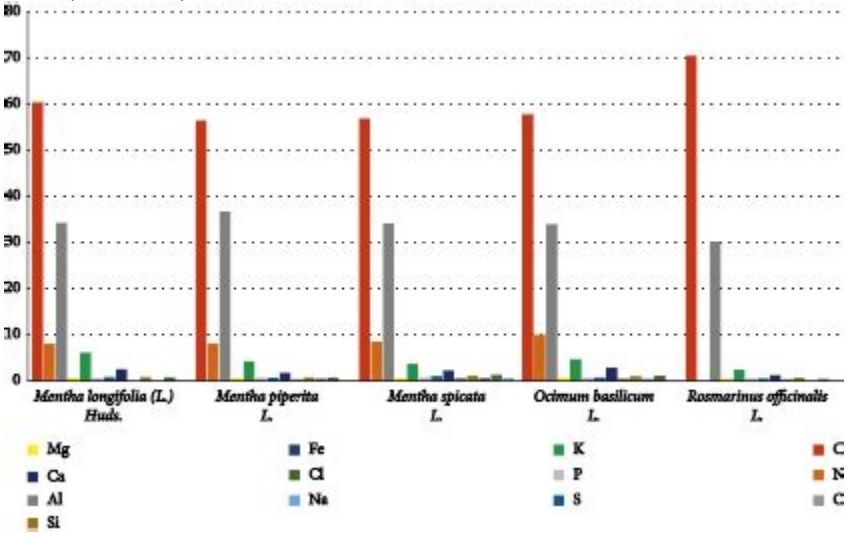

Women like Anavar because very little masculinisation in any form have been seen among woman who have used Anavar at a dose of 5 mg daily. Most women start out on 1 tablet per day and go up to three tablets daily. The dosage of 5 mg of anavar per day has worked out to be the optimum. The first signs of virilisaton could include persistent.

Hello. I've read that doing 5mg of anavar won't do much but wondering is it worth doing 5mg for strength and endurance factor? I'm a female and have the concern of getting noticeable side effects such as oily skin, break outs, agitation, unfocused (any of this would not be favorable for what I do workwise, or at home).

Many labs sell Anavar in doses as low as 2.5 mg but some of the more common doses come in presentations 10, 20 and 50mg oral pills which is too much for women. From my own personal experience, women should tread with caution before taking any kind of anabolic steroid. You should consult with your doctor first! It is better to be safe than sorry.
