

Combien de carrés de chocolat ? **38 x 15**

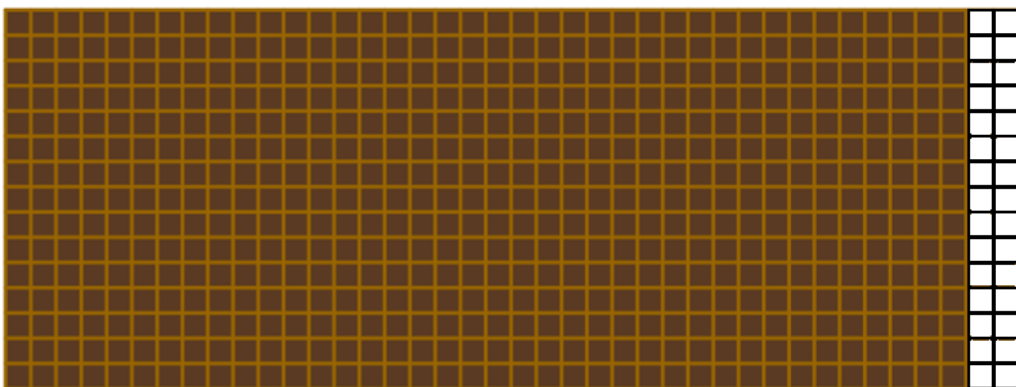

Une solution :

$$30 \times 15$$

$$+ 8 \times 15$$

Une autre solution :

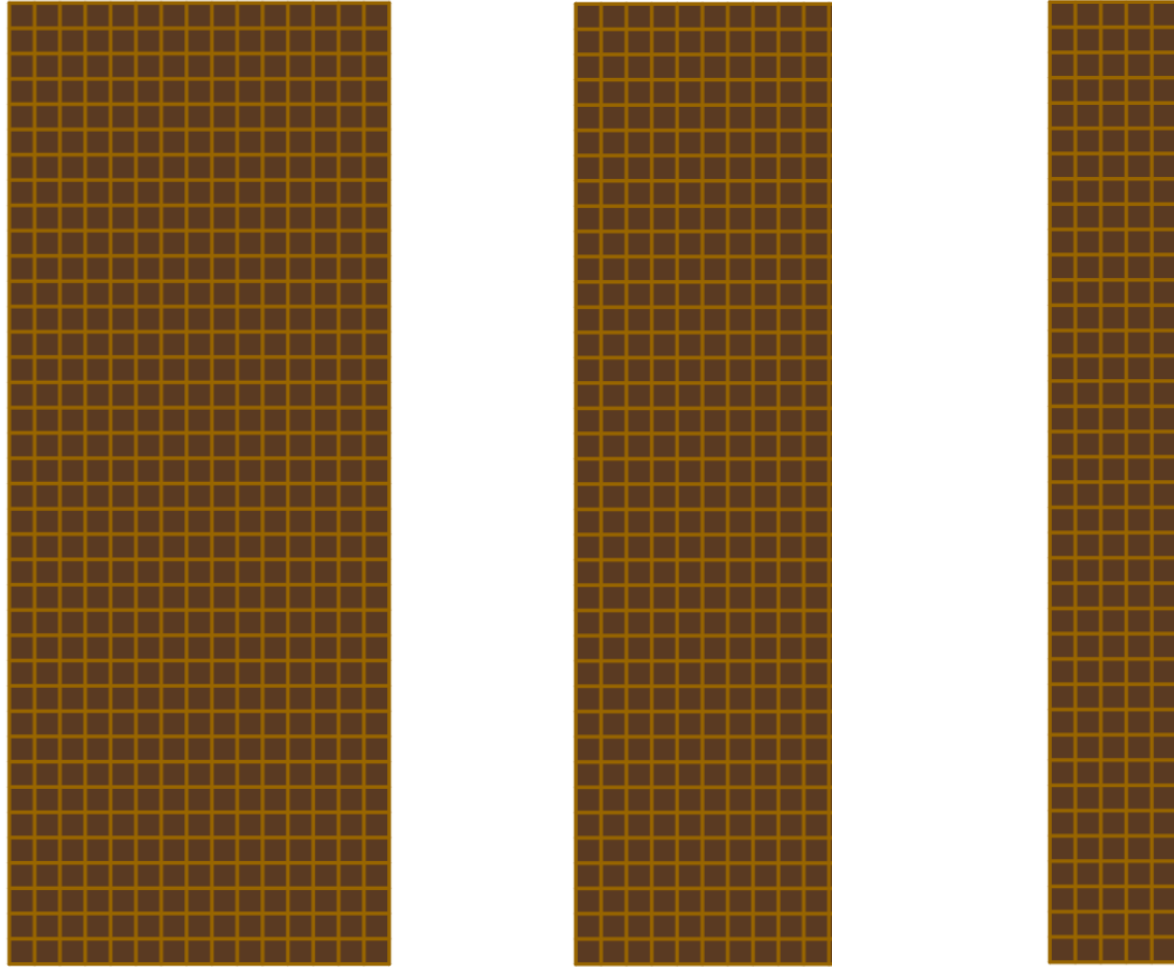

$$40 \times 15 - 2 \times 15$$

Il y a 570 carrés de chocolat.

Mais aussi une troisième solution :

$$15 \times 38 = 10 \times 38 + 5 \times 38$$

Il y a 570 carrés de chocolat.
