PT-141 10mg. PT-141 or Bremelanotide is the generic term for a research peptide being studied for its possible use in helping to improve sexual dysfunction in both men (erectile dysfunction or impotence) and women (sexual arousal disorder). PT-141 was developed from the peptide Melanotan 2, which is a synthetically produced variant of a peptide ...

#forthe love of disney PT-141 Bremelanotide in the form of injection is FDA-approved to treat HSDD in women, but the peptide's affect was originally discovered in men. While researching a drug to darken skin, researchers noticed that men got spontaneous erections. Studies on intranasal administration of PT-141 reported the spray has the same impact as the injection.
