Oxymetholone 50mg Oxymetholone is a potent oral anabolic steroid derived from dihydrotestosterone. More specifically, it is a close cousin of methyl dihydrotestosterone (mestanolone), differing only by the addition of a 2-hydroxymethylene group. This creates a steroid with considerably different activity than mestanolone, however, such that it is very difficult to draw comparisons between the ... Oxymetholone 50mg Oxymetholone is a potent oral anabolic steroid derived from dihydrotestosterone. Oxymetholone is a highly estrogenic steroid. Gynecomastia is often a concern during treatment, and may present itself quite early into a cycle (particularly when higher doses are used). At the same time both subcutaneous water retention and fat levels build. Androgenic side effects are still possible with this substance. Oxymetholone 50mg Magnus Pharmaceuticals. Oxymetholone 50mg Magnus Pharmaceuticals is a potent oral anabolic steroid derived from dihydrotestosterone. More specifically, it is a close cousin of methyl dihydrotestosterone (mestanolone), differing only by the addition of a 2-hydroxymethylene group.
