is no surprise that Test Cyp is considered one of the greatest steroids in the world today. Went to my Endrochronologist and he prescribed to me Test Cypionate (200 mg/week) until whenever. I asked if I should take any PCT drugs and he said only if I am trying to have a baby. What do you guys think? My concerned is that if I am on Test Cyp for an extended duration, it will really suppress my system beyond the little it is doing now.

I started realizing that while there are probably plenty of people out there with a similar body type to mine and less body fat to look up to, my body was still unique. [have a peek at this web-site](#)

Testosterone cypionate is a popular esterified variant of testosterone along with testosterone enanthate (Test E). Let's look in detail at what exactly testosterone cypionate is, how it differs from testosterone enanthate, how bodybuilders use it and what can be used as a natural alternative if you decide you'd rather avoid using it.

After going through the blood work and the usual doctor's visits I started on 200mg of Test. Cypionate biweekly. The first week I noticed changes right away. They were what you'd call small to most men but were huge to me. First I started waking up after only 7 hours of sleep and feeling pretty great. (I used to sleep upwards of 10 hours a day.
