Store at 20° to 25°C (68° to 77°F) [See USP Controlled Room Temperature]. Protect From Light. Now, as awesome as this compound is for females, the problems are in the dosages. We are literally talking about a few MILLIGRAMS for females (and yes this means knowing a compounding pharmacy/lab that can produce these in the adequate size ♦ and yes they are out there ♦ and no do not ask me about them.) With such a small dosage, females can get a robust response so much so that I would almost RATHER use anadrol than almost any other compound out there (given the female NEEDS the fullness and RBC values that this drug brings.)
