Deca Durabolin is a nandrolone based steroid (nandrolone decanoate) that has been widely used since the 60's because of its mild side effects and a much lower rate of aromatization when compared to testosterone. Remember, back in those days bodybuilders did not have access to aromatase inhibitors, so they had to rely on luck, diet, and smarts in order to avoid getting estrogenic side effects. Deca Durabolin - also known simply as Deca - is a highly popular steroid that is used by many bodybuilders in order to increase muscle mass, strength and recovery. All anabolic steroids carry a serious risk, but many bodybuilders and other strength athletes choose to overlook this in order to enjoy the benefits. What is Deca Durabolin. Deca Durabolin is a form of synthetic testosterone. It has the exact same effects that testosterone has on the body; this includes increased hair growth, red blood cell count and

increased muscle formation. Athletes, in particular, use the steroid to help improve their recovery from injuries, manage their joint pain and increase the intensity of their workouts. An advanced Deca cycle then consists of a weekly dose in the range of 400-600mg for 14 weeks, and if the goal is serious bulking, combining this with several other compounds: Testosterone Cypionate at the desired dosage (e.g. 500mg weekly) ran for the entire 16 weeks, Dianabol for the first 6 weeks at 50mg daily, and an addition of HGH also ... <https://mycourseconnection.instructure.com/courses/15663/pages/somatropina-40-ui-mactropin-hgh-191aa> Deca Durabolin fact vs Deca Durabolin fiction: Fiction: Using Deca will destroy my sex drive and give me "Deca dick". Fact: using TOO MUCH Deca will do this, and running it solo without Testosterone may make this happen easier. Fiction: Testosterone needs to be ran higher than Deca.

Deca Durabolin Doses. Coming up with the correct Deca Durabolin doses can be an extremely difficult task for many men. Because the hormone is so suppressive to natural testosterone production, many men will overcompensate with testosterone, shortchange their Deca Durabolin doses or both. Deca durabolin and testosterone are two of the most cardiovascular-friendly steroids available. Testosterone compliments deca durabolin exceptionally well, due to testosterone's androgenic nature reducing the sexual side effects of deca durabolin. However, unlike anadrol, testosterone does this without compromising health in other aspects ... testosterone deca durabolin ratio Hello, I was just wondering your opinion on what ratio you'd run Test E to Deca, have been researching and a lot of places say 2:1 and nearly all forums suggest at least 500mg of test which I know you say isn't always the best, but extra gains can be made there, but what would you run mgs of each, and on pct ... I just started stacking deca 340 mg on Saturday to 200 mg of testosterone depo cyip. Will the testosterone level in my blood work by higher due to me taking deca too? I am having trouble asking my question. I know that injecting testosterone depo cyip raises the test level and can be read in blood work. How is the deca read in blood work? <https://issues.apache.org/jira/browse/AAR-5378>
