

Table 3

Subtracting Matrices

In this center, you will be practicing subtracting matrices. You are expected to do this activity on your own, but can get guidance from your teammates. You may choose ONE of the following two assignment options to complete.

OPTION 1:

A new student walks into class. They are very confused on how you subtract two matrices. You need to explain to them how it works and show them an example. Write down exactly what you would say to them and draw out the example.

OPTION 2:

Step 1: Complete the 5-question worksheet on adding two matrices.

Step 2: Come see me to check your answers. If you have any wrong, you must fix them. If you got them all correct, move onto the next step.

Step 3: Find someone at your table that is having difficulties. Give them assistance, without telling them the answers.
