TESTO 500 Testosterone Enanthate 200 mg/ml. Testosterone Cypionate 100 mg/ml. Testosterone Decanoate 100 mg/ml. Testosterone Undecanoate 100 mg/ml. DESCRIPCIÓN: Una mezcla de testosteronas, la mejor para desarrollar volumen muscular, mantiene altas concentraciones de nitrógeno para la rápida síntesis de células musculares con retención de.

-Testosterone Undecanoate: 750 mg (3 mL) IM injection followed by 750 mg (3 mL) injected after 4 weeks, then 750 mg (3 mL) every 10 weeks thereafter-Testosterone Enanthate and Cypionate: 50 to 400 mg IM injection every 2 to 4 weeks IMPLANT:-2 to 6 pellets (75 mg each) implanted subcutaneously every 3 to 6 months.

A.W. Meikle, in

Comprehensive Medicinal Chemistry II, 2007 6.22.5.5.1.4 Testosterone undecanoate. Testosterone undecanoate (TU) injections of 500 and 1000 mg in hypogonadal males resulted in increased mean serum testosterone levels from less than 10 nmol L⁻¹ to 47.8±10.1 and 54.2±4.8 nmol L⁻¹, respectively, after about 1 week. By 50-60 days, serum testosterone levels decreased and. Testosterone Undecanoate, or any other - regardless of the attached ester, is having the most common dosage of anywhere between 200 to 500 mg a week. The dosage protocol depends on each testosterone in particular as it was mentioned, testosterone undecanoate should be injected once or at maximum twice per week because of the long half life.

If you are 65 or older, use testosterone undecanoate injection with care. You could have more side effects. This medicine is not approved for treating low testosterone levels caused by getting older. Talk with your doctor. This medicine may affect sperm in men. This may affect being able to father a child. [click here now](#)
