Testosterone Enanthate Overview and History. Testosterone Enanthate is one of the many esterified variants of Testosterone available. It is an injectable compound with a slow rate of release due to the larger Enanthate ester attached to the Testosterone molecule. Testosterone alone with no ester bonded to it possesses a half-life of approximately 2 - 4 hours. When the Enanthate ester is attached to it, creating

Testosterone Enanthate, the half-life of Testosterone is now extended to 10 days, providing a slower release and activity of the hormone. Properties of Testosterone Enanthate
