European Commission final decision Overview AstraZeneca AB submitted on 29 April 2009 an application to the European Medicines Agency (EMA) for Arimidex (anastrozole), and triggered a procedure under Article 29 of Regulation (EC) No 1901/2006, as amended. [check this out](#)

Anastrozole inhibits CYPs 1A2, 2C8/9 and 3A4 in vitro. Clinical studies with antipyrine and warfarin showed that anastrozole at a 1 mg dose did not significantly inhibit the metabolism of antipyrine and R- and S-warfarin indicating the co-administration of Arimidex with other medicinal products is unlikely to result in clinically significant medicinal product interactions mediated by CYP ...
