PenMate ® is a cover for the FlexPro ® pen, and we created it for people who prefer not to see the needle on their pens. PenMate ® comes separately and is designed exclusively for use with FlexPro ® 5 mg, 10 mg, and 15 mg pens.. PenMate ® completely covers the needle—meaning you won't see the needle during injection. Just press the insertion button on PenMate ® to insert the needle ... Norditropin FlexPro Pen side effects. Get emergency medical help if you have signs of an allergic reaction: hives; difficult breathing; swelling of your face, lips, tongue, or throat.. Serious breathing problems may occur in patients with Prader-Willi syndrome who use Norditropin FlexPro Pen. Trauma can be caused by many types of injury, whether intentional or unintentional, due to an emotionally distressing experience or physical injury. Firearm injuries, motor vehicle collisions, and falls are some of the most common

types of trauma. Young children are more likely to be affected by drowning, while elderly patients are more likely to have ground-level falls (falls from sitting or standing). Trauma can be a frightening and overwhelming experience. This page specifically addresses physical trauma events, which can range from minor injuries to life-threatening conditions.

Norditropin ® is given (or "delivered") as a daily injection. The FlexPro ® pen is a delivery device that comes prefilled and preloaded. It uses our shortest and thinnest needle available. a Take a quick tour of the pen and see just how different it is. a Needles are sold separately and may require a prescription in some states. Norditropin Nordiflex® is a disposable, premixed, prefilled pen that makes taking growth hormone simple. Norditropin Nordiflex® 5 mg and 10 mg delivery pens are the only prefilled, multi-dose, disposable growth hormone pens that, after initial use, can be stored at up to 77°F for use within 3 weeks Unlike other growth hormone delivery pens.
